FiberBox: persistent red optical light

SOP-LANG-OPTICAL-EN | 20261101-1 | en

Synthetic demo only. Publication requires the information owner's review.

Applies only to FiberBox, demo region, firmware 2.x.

1. Confirm the product and firmware before using this procedure. If either is unknown, stop and contact support.

2. Check whether the red optical light remains on. Report the observed light status to support.

3. Do not disconnect the optical cable, open the device, or perform a factory reset.

4. If the red light remains on, open a support ticket with the product, firmware and observed light status. Do not claim that service has been restored.
